

# TERRE DI GIORGIO

ESG & Sustainability Report 2026 | Certified Organic Estate

## 1. Executive Summary

**Terre di Giorgio** (Giorgio Società Agricola S.S.) spans 120 hectares of pristine, certified organic land at the foothills of Mount Amiata in the UNESCO-protected Val d'Orcia region (Castiglione d'Orcia, Tuscany, Italy). Grounded in the restoration of historic properties registered in the historic *Leopoldino Land Registry*, founder Alberto Giorgio established a self-sustaining agricultural and hospitality ecosystem.

This report consolidates Environmental, Social, and Governance (ESG) strategic performance indicators aligned with the GRI Universal Standards 2021 and Sector Standard GRI 13 (Agriculture, Aquaculture and Fishing Sectors 2022).

## 2. Environmental Stewardship (E)

Our environmental philosophy focuses on soil carbon sequestration, zero synthetic chemicals, and rigorous water conservation:

- **100% Certified Organic Management:** Strict prohibition of synthetic fertilizers, chemical pesticides, and herbicides across 7.5 hectares of Sangiovese vineyards and 1,350 olive trees.
- **Polyculture & Soil Vitality:** Active cultivation of organic saffron, ancient grains, and cover crops (sovescio) to regenerate soil organic matter and maximize carbon storage.
- **Closed-Loop Water Recirculation:** Dedicated rainwater collection basins capture over 4,500 m<sup>3</sup> of annual run-off for precision, low-volume targeted summer drip irrigation (quota: 600 m<sup>3</sup>/ha).
- **Microclimate AgTech & Crop Protection:** On-site automatic weather stations (centraline meteo) tracking rain and wind patterns, paired with anti-hail nets to safeguard crops without chemicals.
- **Energy & Fuel Efficiency:** Annual agricultural diesel consumption is contained at ~68 liters/ha. An amortization plan is active for a 15 kW rooftop photovoltaic installation designed to cover 70% of winery and agriturismo refrigeration electricity needs.

## 3. Social Impact & Community Integration (S)

Terre di Giorgio operates a high-value, low-impact boutique agriturismo (Villa la Palazzetta) and organic restaurant designed to protect local heritage and support the local regional economy:

- **Km 0 Local Supply Chain:** 95% of ingredients and raw materials for our organic restaurant are sourced directly from local Val d'Orcia artisans, farmers, and producers located strictly within a 25-kilometer radius.
- **Fair Local Employment:** Maintenance of 7 to 8 permanent, year-round staff members supported by an extended operational season spanning from March to early January. 100% of workers are employed under national collective labor agreements (CCNL) as permanent or extended seasonal staff.
- **Workplace Health & Safety:** Zero workplace accidents recorded across all agricultural, cellar, and hospitality operations during the 2024–2025 biennial period.
- **Boutique Capacity Limits:** Restricted retreat capacity (8 refined rooms, maximum 20 guests) minimizing ecological footprint while offering authentic slow living experiences.

## 4. Governance & Product Traceability (G)

Transparency, heritage restoration, and local sourcing define our governance strategy:

- **Heritage Conservation:** Historic architectural preservation of 1935 structures (Villa la Palazzetta, originally built by Conti Cervini) preserving historical landscapes registered in the Leopoldino Land Registry.
- **Internal Ethical Code:** Adoption of an internal code of conduct on sustainable organic farming practices and continuous environmental benchmark monitoring.
- **Circular Craftsmanship:** Organic wine lees and Sangiovese grape pomace are circular-processed—distilled locally into artisanal Calus Grappa or returned to estate soil as high-quality compost.
- **Local Industrial Sourcing:** All glass bottling and protective tin packaging are ordered from nearby regional companies (Aziende vicine) to minimize transport emissions.

## 5. ESG Key Performance Metrics Summary

| Category      | Indicator & Scope                                                                                      | Current Value / Status |
|---------------|--------------------------------------------------------------------------------------------------------|------------------------|
| Environmental | <b>Organic Farming:</b> No synthetic chemicals on 7.5 ha vineyards & 1,350 trees; 100% manual harvest. | 100% Certified Bio     |
| Environmental | <b>Water Recirculation:</b> Rainwater harvesting with closed-loop drip irrigation.                     | Closed-Loop            |
| Environmental | <b>AgTech Monitoring:</b> On-site weather tracking and anti-hail netting.                              | Active Deployment      |
| Social        | <b>Short Supply Chain:</b> % of ingredients from local Val d'Orcia producers.                          | 95% (Km 0)             |
| Social        | <b>Local Employment:</b> Permanent local staff across extended season (Mar-Jan).                       | 7–8 Permanent Staff    |
| Governance    | <b>Heritage Preservation:</b> Restoration of Leopoldino assets and local packaging.                    | 100% Preserved         |

# TERRE DI GIORGIO

Rapporto ESG e Sostenibilità 2026 | Azienda Agricola Biologica Certificata

## 1. Sintesi Esecutiva

**Terre di Giorgio** (Giorgio Società Agricola S.S.) si estende su 120 ettari di terreno incontaminato e certificato biologico alle pendici del Monte Amiata, nella Val d'Orcia, regione protetta dall'UNESCO (Castiglione d'Orcia, Toscana, Italia). Fondata sul restauro di proprietà storiche registrate nel catasto storico *Leopoldino*, il fondatore Alberto Giorgio ha creato un ecosistema agricolo e ricettivo autosufficiente.

Questo rapporto consolida gli indicatori di prestazione strategica Ambientale, Sociale e di Governance (ESG) in linea con i GRI Universal Standards 2021 e con lo standard settoriale GRI 13 (Agriculture, Aquaculture and Fishing Sectors 2022).

## 2. Gestione Ambientale (E)

La nostra filosofia ambientale si concentra sul sequestro di carbonio nel suolo, sull'assenza di prodotti chimici sintetici e su un rigoroso risparmio idrico:

- Gestione 100% Biologica Certificata:** Divieto assoluto di fertilizzanti sintetici, pesticidi chimici ed erbicidi su 7,5 ettari di vigneti di Sangiovese e 1.350 ulivi.
- Policoltura e Vitalità del Suolo:** Coltivazione attiva di zafferano biologico, grani antichi e colture di copertura (sovescio) per rigenerare la materia organica del suolo e massimizzare lo stoccaggio del carbonio.
- Ricircolo Idrico a Ciclo Chiuso:** Bacini dedicati alla raccolta dell'acqua piovana catturano oltre 4.500 m<sup>3</sup> annui di deflusso per un'irrigazione estiva di precisione a goccia a basso volume (quota: 600 m<sup>3</sup>/ha).
- AgTech Microclimatica e Protezione:** Centraline meteo automatiche in loco combinate con reti anti-grandine salvaguardano la resa dei raccolti senza interventi chimici.
- Efficienza Energetica e Combustibili:** Consumo annuo di gasolio agricolo contenuto a circa 68 litri/ha. Piano di ammortamento attivo per un impianto fotovoltaico integrato su tetto da 15 kW, progettato per coprire il 70% del fabbisogno elettrico di cantina e refrigerazione agrituristica.

## 3. Impatto Sociale e Integrazione Comunitaria (S)

Terre di Giorgio gestisce un agriturismo boutique di alto valore e basso impatto (Villa la Palazzetta) e un ristorante biologico progettato per proteggere il patrimonio locale e sostenere l'economia regionale:

- Filiera a Km 0:** Il 95% degli ingredienti e delle materie prime per il nostro ristorante biologico proviene direttamente da artigiani, agricoltori e produttori locali della Val d'Orcia entro un raggio rigoroso di 25 chilometri.
- Occupazione Locale Equa:** Mantenimento di 7-8 dipendenti permanenti tutto l'anno, supportati da una stagione operativa estesa da marzo a inizio gennaio. Il 100% dei lavoratori è assunto con Contratto Collettivo Nazionale di Lavoro (CCNL) agricolo a tempo indeterminato o con contratti stagionali estesi fino a 10 mesi.
- Salute e Sicurezza sul Lavoro:** Zero infortuni sul lavoro registrati nell'intero comparto agronomico, di cantina e ricettivo nel corso del biennio 2024–2025.
- Limiti di Capacità Boutique:** Capacità di accoglienza limitata (8 camere raffinate, massimo 20 ospiti) minimizzando l'impronta ecologica e offrendo autentiche esperienze di slow living.

## 4. Governance e Tracciabilità del Prodotto (G)

Trasparenza, restauro del patrimonio e approvvigionamento locale definiscono la nostra strategia di governance:

- **Conservazione del Patrimonio:** Conservazione architettonica storica di strutture del 1935 (Villa la Palazzetta, originariamente costruita dai Conti Cervini) preservando i paesaggi storici registrati nel Catasto Leopoldino.
- **Codice Etico Aziendale:** Adozione di un codice etico interno sulle buone pratiche agronomiche biologiche e piano pluriennale di monitoraggio dell'impatto ambientale.
- **Artigianato Circolare:** Le vinacce di vino biologico e le bucce d'uva Sangiovese vengono lavorate in modo circolare: distillate localmente in Grappa Calus artigianale o restituite al terreno dell'azienda come compost di alta qualità.
- **Approvvigionamento Industriale Locale:** Tutte le bottiglie di vetro e gli imballaggi protettivi in stagno sono ordinati da aziende regionali vicine per ridurre al minimo le emissioni dei trasporti.

## 5. Riepilogo Indicatori Chiave di Prestazione ESG

| Categoria  | Indicatore e Ambito                                                                                                                           | Valore Attuale / Stato |
|------------|-----------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| Ambientale | <b>Certificazione Agricoltura Biologica:</b> Divieto di prodotti chimici sintetici su 7,5 ha di vigneti e 1.350 ulivi. Raccolta 100% manuale. | 100% Bio Certificato   |
| Ambientale | <b>Tasso di Ricircolo Idrico:</b> Raccolta acqua piovana con ricircolo a ciclo chiuso per irrigazione a goccia.                               | Ciclo Chiuso           |
| Ambientale | <b>Monitoraggio Microclima AgTech:</b> Monitoraggio meteo in loco abbinato a reti anti-grandine non invasive.                                 | Distribuzione Attiva   |
| Sociale    | <b>Indice Filiera Corta (Km 0):</b> Percentuale di ingredienti culinari provenienti direttamente da produttori della Val d'Orcia.             | 95%                    |
| Sociale    | <b>Occupazione Locale Stabile:</b> Staff locale permanente su stagione estesa (marzo - inizio gennaio).                                       | 7–8 Staff Permanente   |
| Governance | <b>Conservazione Patrimonio:</b> Restauro beni Catasto Leopoldino & packaging locale.                                                         | 100% Preservato        |

## 6. Panoramica del Portafoglio Artigianale Aziendale

1. 

---
- Vino Rosso Calus (IGT Rosso Toscana):** 100% Sangiovese, raccolto a mano da 7,5 ha di vigneti biologici. Affinato in barrique di rovere francese. Produzione: ~8.000 bottiglie. Potenziale di invecchiamento: 25 anni.

**2. Diana Rosato (IGT Toscana Rosato):** 100% raccolta manuale. Rosato rosa cipria da Sangiovese puro. Finale fresco di agrumi. Produzione: ~1.200–1.300 bottiglie.

**3. Grappa Calus:** Distillazione artigianale di vinacce di Sangiovese. Liscia e cristallina. Produzione: ~200 bottiglie.

**4. Olio Calus EVO (Olio Extra Vergine di Oliva Bio):** Estratto a freddo da 1.350 ulivi. Conservato in lattine cilindriche protettive da 250ml. Produzione: ~400 lattine.

**5. Zafferano Bio Calus (Zafferano Bio):** Puri fili biologici raccolti a mano all'alba. Essiccati tradizionalmente. Formato: vasetto in vetro da 1g.
- 

*\* Verifica del Rapporto: Verificato tramite audit ambientali interni annuali e organismi di certificazione regionale Toscana Bio. Allineamento standard: Framework GRI Agricoltura e Ospitalità.*
